

Note : (3-13-2013)

Blender3d Tip (version 2.65) :

Open Exr (Full Float RGBA) in Blender 2.65

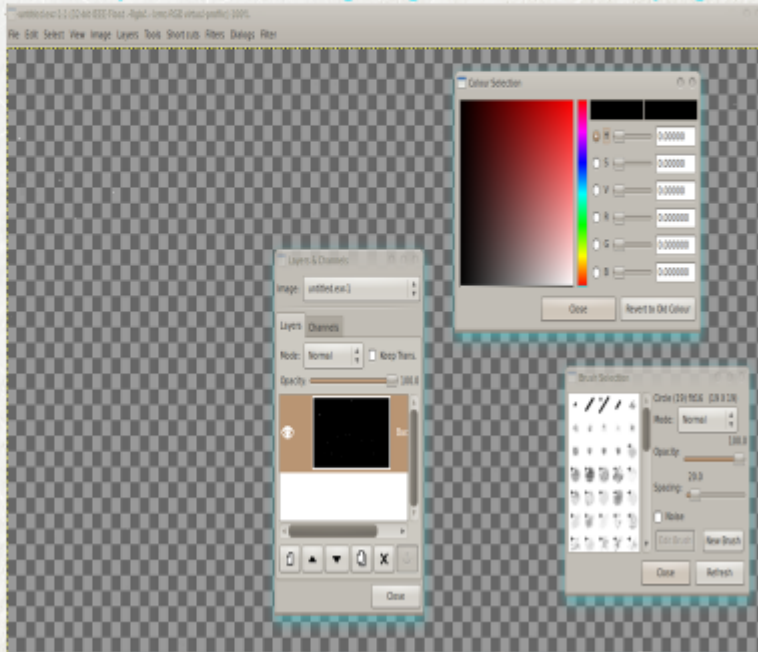

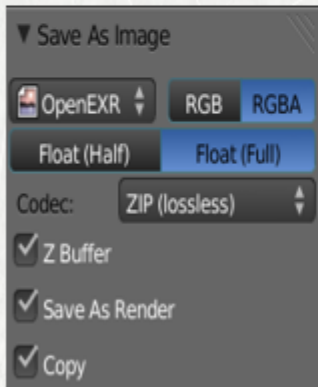

Open Exr (Full Float RGBA) in Blender 2.65

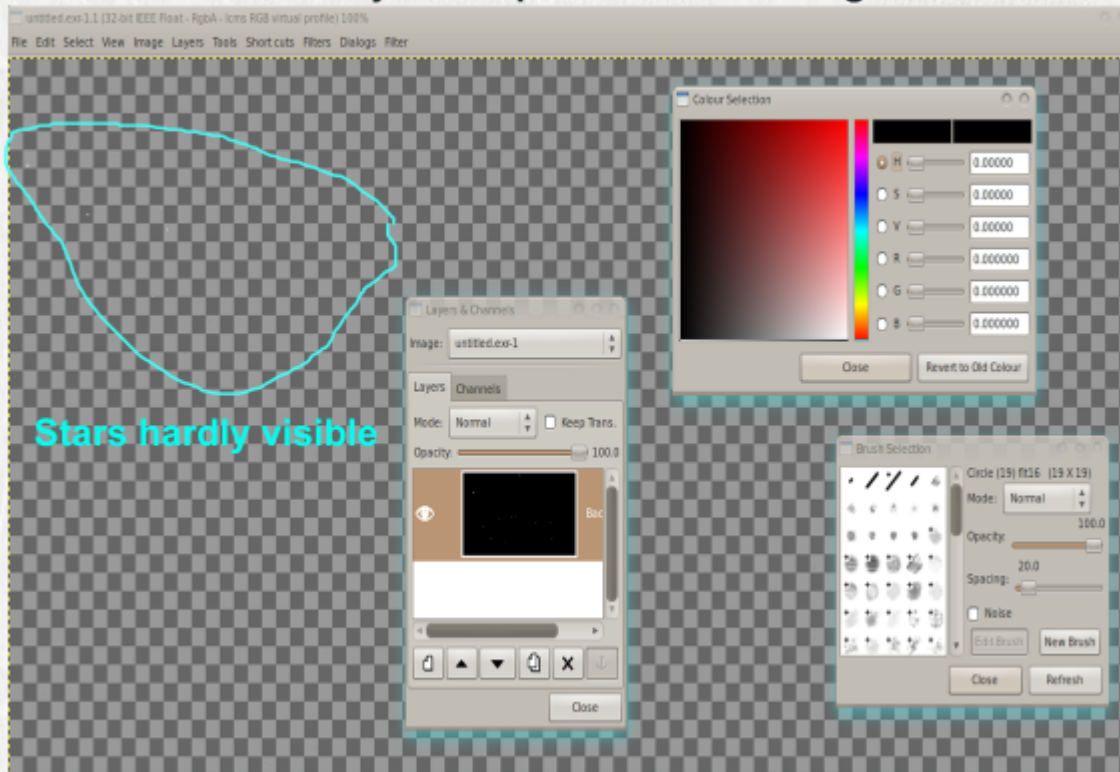

This image extension in Blender 2.65 will help achieve some maximum effects while working with CinePaint and the Node compositor for enhanced results.

[Use Cinepaint For enhancing Image or Other Suitable program](#)

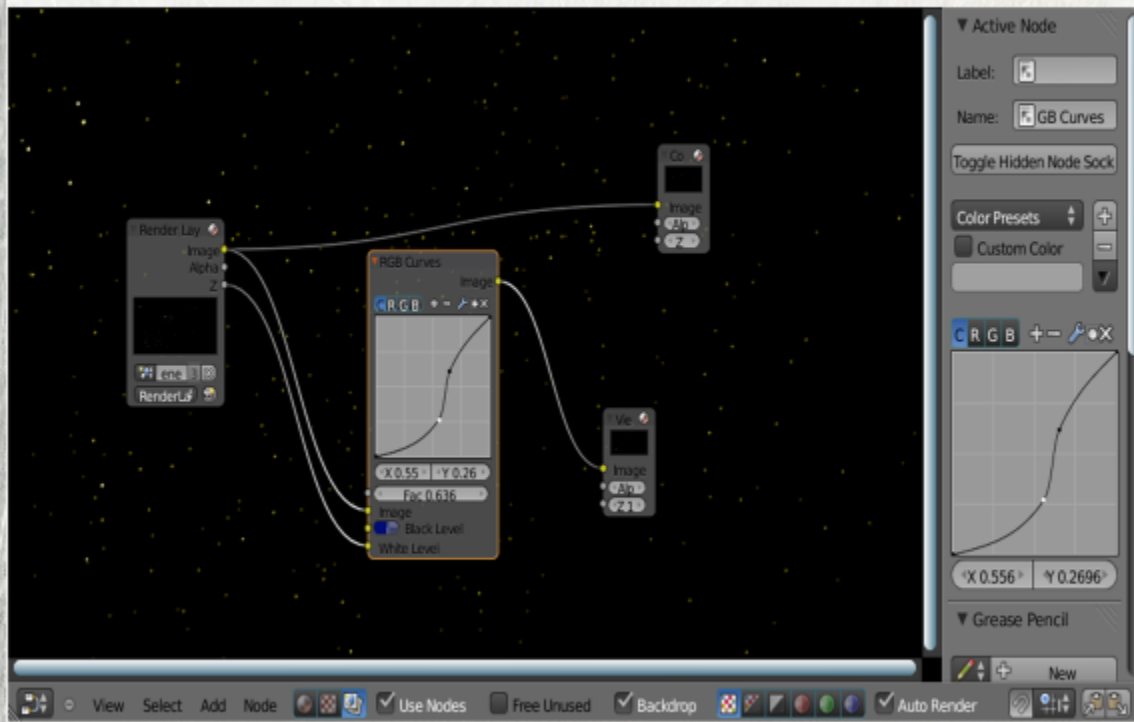

OpenExr Save As Image

Close Up of image in CinePaint. Image is hardly visible due to Zbuffer and layer compression for editing.

Open Image as a Plane (plugin) or use render layers for those more advanced to have separate render pass for scene.

Node Setup :

Render Layers
RGB Curves
Glare
